Control

SIMPLIFIED SYSTEM ADMINISTRATION

Gain easy control from anywhere with no local software to manage, 24/7 system health monitoring, and auto updates for security patches and new features.

PROPERTY PROTECTION AND AUTOMATION

Create rules to automate events like pressing one button to lock all doors and arm your alarm. Powerful artificial intelligence detects unusual activity and video clips of critical events are sent automatically to cloud storage.

ROBUST DATA AND NETWORK SECURITY

A secure platform with end-to-end encrypted traffic, dual-factor authentication, and secure VPN connection provides peace of mind.

POWERFUL DATA AND REPORTING

Run and download event history for up to one year. Search video clips by sensor activity and create automated reports for instant access.

PROHIBITED AREAS**

Perimeter Detection Analytics

Receive notifications of people or vehicles entering your property when they shouldn't, while ignoring unimportant motion like rain or shadows.

VIDEO Surveillance

Stay aware of what's happening in and around your business property anytime, anywhere.

24/7 HD RECORDING

Quickly find video of important events using the mobile app, website, or the recorder's local interface.

CLOUD STORAGE FOR CRITICAL EVENTS

Recorded video can be securely stored off-site so it won't be lost or destroyed in an emergency.

VIDEO HEALTH REPORTS AND NOTIFICATIONS

Ensure your cameras are online, video storage is being properly managed, and your camera views are unobstructed with 24/7 health monitoring and scheduled status reports.

COMMERCIAL Intrusion Protection

Reliable security and automation ensure your business, employees, and inventory stay protected.

EASILY MANAGE USER CODES

Add or remove user codes, assign access by partition and create auto-expiring codes, all from one interface.

AUTO-ARMING

Never risk forgetting to arm the system by enabling auto-arming at a set time, or after a pre-determined period of sensor inactivity.

SYSTEM EVENT HISTORY

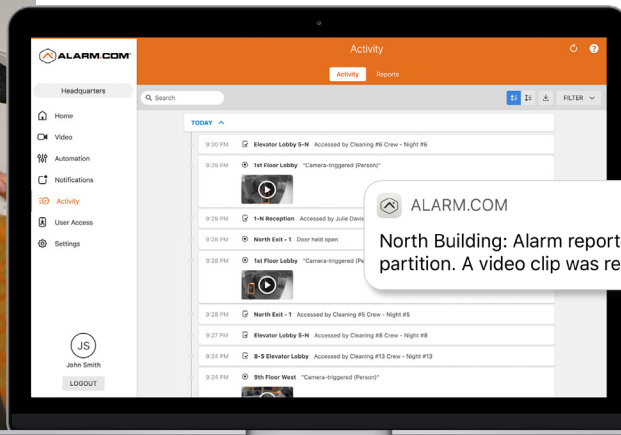

Access up to 365 days of complete event history for internal record-keeping and auditing.

REPORTS

Use scheduled reports to quickly understand operational trends, such as arming/disarming, sensor activity, door access, and more.

ACTIVITY NOTIFICATIONS

Receive instant notification of critical issues such as a possible intrusion, power outage, late open, early close, or off-hour disarm.

SMARTER Access Control

Smarter Access Control is a powerful, easy-to-use solution that helps you manage access to your business locations from anywhere.

EASY USER AND PERMISSION MANAGEMENT

Save time by uploading users in bulk and easily set when and where they have access.

ANYWHERE ACCESS

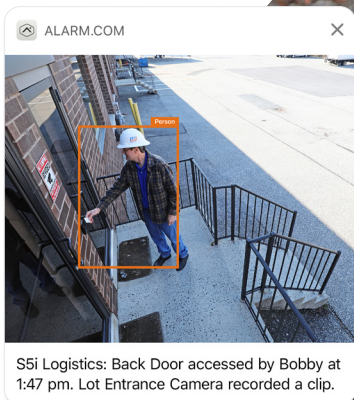

Use the mobile app or website to lock or unlock doors from anywhere, at anytime.

DETECT UNUSUAL ACTIVITY

Receive immediate notifications when doors are accessed at unusual times or by unknown people and act if necessary.

VIDEO TAGGED FOR ACCESS EVENTS

Associate events with video recordings to easily find footage of door entries or failed access attempts.

MULTI-LOCATION Management

Manage all your properties from one dashboard, including real-time status of doors, alarm states, live video, and more.

USER MANAGEMENT

Easily create or revoke alarm user codes and card access permissions across multiple locations.

LOCATION HIERARCHY

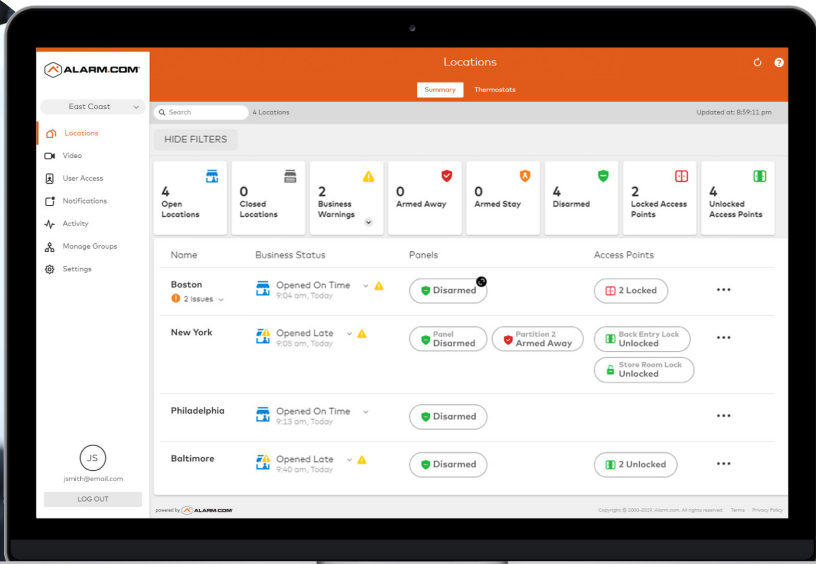

Organize locations into logical groups, such as by region or manager, and easily move locations between groups to accommodate business growth.

UNIFIED SETTINGS

Apply the same settings for business hours, notifications, and more across a group of locations.

MULTI-LOCATION REPORTS

Automatically receive scheduled multi-location activity reports to get actionable insight across all your properties.

"All the systems we had in place before were small business-minded. As we were transitioning from a small- to medium-sized business, it was important that we put systems in place that will scale with us and be what we need for the long run... like Alarm.com"
