

Security for the Hospitality Industry

The hospitality industry faces a unique set of physical security challenges. From a constantly changing clientele to the need to secure that clientele's physical assets, hotels need a smart security management solution.

HOW MCC CAN HELP

CONTROLLED ACCESS

Card Access locks on hotel room doors are essential today. The cost and security risk of traditional door locks and keys is too great for any hotel. In addition to guest rooms, controlled access should be used for employee only areas and can be used to secure elevators, stairwells and entry/exit ways to keep visitors limited to only the areas you want.

SECURITY CAMERAS

A quality security camera system is important for the hospitality industry. From protecting clients and their possessions to protecting your business from fraud and employee crime, the protection of a 24/7 camera solution can help ensure your facility, and everyone in it, is safe. MCC provides only quality solutions that allow you to remotely access your camera feeds from anywhere to help increase your peace of mind.

EMERGENCY ALERT SIGNAGE

In the case of an emergency situation, clear and concise direction is needed. With MCC's digital signage solutions, strategically placed displays throughout your facility can broadcast emergency alerts to direct guest to the nearest exits, provide safety instructions, or provide necessary information to reduce panic. And when there is no emergency, these displays can be used to display advertising, wayfinding or other informational materials.

Other Ways MCC Can Help

MCC has 6 distinct divisions including document and mailing solutions, audio visual solutions, telecom, and rental. For more information, please contact our sales department or visit our website.

HOW MCC CAN HELP

Document Solutions

MCC has top brand copiers and printers for sale, lease, or short-term rental, which means we are uniquely suited to meet your facilities needs as well as the needs of your conference or business clients who might need short term use of a device while staying at your facility. MCC also offers several document management and managed print services options for your eco-friendly, digital document business.

Audio Visual Solutions

From permanent meeting/conference room AV, to short term AV solution rentals, MCC has you and your clients covered. Whether it is a simple projector and screen setup or a full sound system for your entire hotel, the experts at MCC know what works best and will use their 45+ years experience to find you the best solution.

Telecom Solutions

Quality customer service is a necessity in the hospitality industry and a quality phone system is a key factor in your customer service. If your staff or guests cannot be heard or understood, you run the risk of lost clients and profits. MCC's business phone systems will help ensure your staff and customers can communicate clearly.
